

Event Date and Location

TURK KOMPOZIT 2013

1st Turkish and Regional Summit & Forum for Composites, Technology, Industry and Applications

3-4-5 October 2013

Istanbul, The Green Park Hotel Pendik

Dogu Mahallesi Temenye Mevkii Eski Ankara Cad. No:200

Pendik / Istanbul / Turkey

Tel.: +90 (216) 585 21 21

Fax: +90 (216) 491 94 94

COMPOSITES SUMMIT
ISTANBUL - **OCTOBER 3-5 2013**
The Green Park Hotel Pendik

How to get there

The Green Park Hotel Pendik is a one hour taxi drive from Istanbul's Ataturk International Airport and a 10 minutes taxi drive from the smaller Sabiha Gokcen International Airport.

Ataturk International Airport is a major airport hub and flights are available to and from all the worlds' major cities.

Sabiha Gokcen International Airport is a smaller regional international airport but is serviced from several European cities.

The deadline for showcase participation registration is the 1st of August 2013.

The application deadline for technical seminars is the 15th of June 2013.

The application deadline for commercial seminars is the 15th of June 2013.

The application deadline for live product/application demonstrations is the 15th of June 2013.

We are looking forward to seeing you in Istanbul.

Who is Organizing?

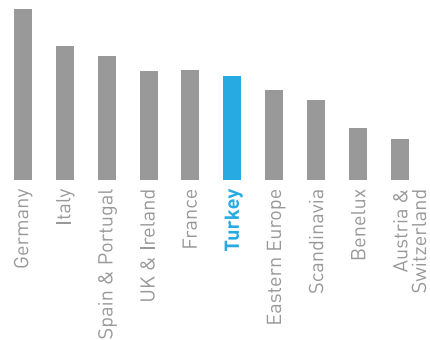

About Turkish Composites Manufacturers Association (TCMA)

The TCMA is a non profit organization representing raw material, semi-finished, intermediate and finished product producers, suppliers and academic institutions of the Turkish composite industry. The TCMA was established in May 18, 2005. The objectives of the Association are to promote the use of composites in every aspect of life; to conduct activities regarding its introduction, information sharing, standardization and development for the benefit of governmental and local authorities, users, manufacturers and scientific institutions; to make the necessary studies to base the manufacturing and usage of composites on scientific grounds. The ultimate aim is to create synergy by gathering the relevant manufacturers and scientific institutions under one roof to strengthen the composite industry in Turkey.

Why Turkey?

Key Facts and Figures

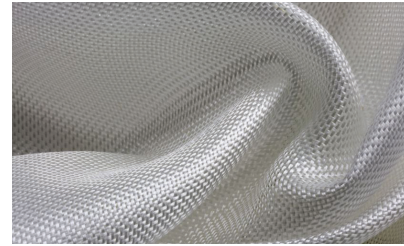

Diverse Industrial Development

Carbon Fibre Applications
GRP Pipe Applications
Automotive and Transport
Renewable Energy
Marine
Construction and Building
Engineering Plastics

#6 Largest Composites Manufacturer in Europe

At present, the Turkish composite sector has approximately 5,000 employees distributed in 150-200 middle and large-scale companies and 700-800 companies which are partly involved in composite business. The overall annual production is 200 thousand tons.

Fastest Growing Composites Market of Europe

The composite sector's growth rate in Turkey is higher than that of Europe and the rest of the world. Growth rates between 8% and 12% were seen in Turkey in the years before the economic downturn of 2008, during the recovery period the growth rate is between 9% and 10%.

Manufacturing Hub for Global Brands

Turkey is poised to become a manufacturing hub for global brands in the next few years, according to financial reports. Global brands are already looking at Turkey as a manufacturing base for their products, while others are sourcing their requirements from Turkey. The cost advantages of manufacturing in Turkey, particularly in labour intensive sectors, will influence the increasing manufacture of foreign brands in the country.

Steadily Growing Economy

The Turkish economy has shown remarkable performance with its steady growth over the last eight years. The structural reforms, hastened by Turkey's EU accession process, have paved the way for comprehensive changes in a number of areas. As these reforms have strengthened the macroeconomic fundamentals of the country, the economy grew with an average annual real GDP growth rate of 5.2 percent over the past nine years between 2002 and 2011.

Reasons to do business with Turkey

With a successful economy, high population, qualified and competitive laborforce, liberal and reformist investment climate, infrastructure, central location of the country, energy corridor and terminal of Europe, low taxes and high incentives, customs union with EU since 1996 and large domestic market, Turkey represents an ideal place to centre manufacturing.

What to Expect at TURK KOMPOZIT 2013?

TURK KOMPOZIT 2013 is a composites industry event covering manufacturing, processing and application methods specific to the composite industry.

Events Scope

The event will cover:

Raw Materials (Resins, Fabrics, Thermosets, Thermoplastics, Additives), Semi-finished products, Intermediate products and Finished products, Processing Technologies, Machines, Equipment, Consumables, Construction & Simulation services.

Technical Seminars

Commercial Products and Services

Live Demonstrations

Awards

Visitors

Visitor target groups are designers, engineers, technicians, buyers, students, management of OEMs, suppliers and decision makers from the most important composite application industries.

Industries

Automotive
Aerospace
Building and Construction
Electrical and electronics
Leisure
Marine
Transportation
Wind Energy etc.

Companies

Raw Materials suppliers (Resins, Fabrics, Thermosets, Thermoplastics, Additives)
Manufacturers of Semi-finished products
Manufacturers of Intermediate products
Manufacturers of Finished products
Processing Technologies
Machines
Equipment
Consumables
Simulation services.

Why Participate?

To meet local and regional users

- You can reach all leaders of the Turkish composites industries.
- You can make effective sales and purchasing.
- You can establish partnerships for your projects.
- You can initiate effective business relations for a steadily growing market.

Why Visit?

To learn more about the industry

- To find contacts for composite producers.
- To find contacts for raw materials.
- To learn more about technical applications.
- Job opportunities.
