

# PIE Spot Price Monitor

A new survey among trade experts

## PIE Spot Price Panel: Join now!

The price trend for European PE and PP spot material is becoming increasingly important to the market in general. Therefore PIE has extended its monthly contract reporting by a new weekly service highlighting the spot market developments of the most important plastic types. PIE's „Spot Price Monitor“ is an add-on to a regular PIE subscription.

You now have the one-time, limited option of joining our weekly survey completely free of charge. This exclusive circle of informants forms the base of our weekly data. You can sign up by filling in our online questionnaire.

Register now at
